RAILROAD RATE WARS.

Special Dispatches to THE RECORD

SALT LAKE, Dec. 21.—Silver, 68 1/2; Lead, 50.

Railroad Rate Wars.

SALT LAKE, Dec. 23.—Notice has been issued by the Rio Grande Western that all tariffs in connection with the Utah Central will be withdrawn January 1st. The Rio Grande has also issued notice of withdrawal of all tariffs in effect over the San Joaquin Valley line. Bitter competition has caused this action but it will not affect the rates into the San Joaquin Valley. The Union Pacific and Rio Grande Western local pool is now extending into Tintic. The outcome of these movements among freight officials is now uncertain. But one construction can be placed on the actions of these two roads and that is that it is another case of larger corporations combining to throttle smaller ones. There is a combination not only against the Utah Central, but also the San Joaquin Valley and the Salt Lake and Hot Springs lines.

The Rio Grande Western and the Union Pacific have quit fighting and are now working together to freeze out the local lines. One plan seems to be to raise the rates on outgoing or incoming matter from Park City. The real objects of these movements, aside from controlling Utah rates, seems to be the ultimate control of all local roads. The object of the Rio Grande is, by depriving the Utah Central of Park City business to force the latter to leave or to sell its road. The inference also is that while the Rio Grande is gobbling up the Utah Central the Union Pacific will be engaged in strangling the life out of the San Joaquin Valley infant.

The Brazilian War.

A special from Pernambuco, Brazil, says concerning the war at Rio: "The greatest mystery surrounds the movements of Rear Admiral Mello. Nothing has been seen of him since he sailed north on the 20th. Presumably he is sought to the new government cruiser Niteroi and America. The Spanish war ship Cristobal arrived from Rio and reports that on Christmas eve there was a heavy engagement between the Rebel war ships and forces, both sides are said to have suffered severely. Late in the day great excitement was caused by the news that Admiral Mello had arrived at Bahia and the men on board the Niteroi began with alacrity to get things in readiness to meet them. The rebel warship is reported to be at Bahia preparatory to starting for Pernambuco to capture and destroy the Niteroi after which, if successful he will give the America a drubbing. Mello is expected here to-morrow. It is not expected that he will attack in broad daylight. It is now said the Niteroi will steam out to meet him.

English Slaughtered in Africa.

LONDON, Dec. 27.—Several South African merchants in this city received cable messages to-day announcing that Captain Wilson's scouting party which has been pursuing King Lobengula, and which has not been heard from for some time, was completely annihilated by Matabele. It is stated that in addition to Wilson's party, a party under Captain Barrow, sent out to re-inforce him, has been cut to pieces. No press dispatches have been received which either confirm or contradict these reports. The number composing Wilson's detachment is said to have been forty to one hundred and the Barrow detachment is reported to be composed of about the same number. The news caused great excitement in the city and is being magnified on all sides. Rumors have it that the two columns were composed of several hundred men and after being completely surrounded by the Matabele, were charged upon and slaughtered, the bodies being horribly mutilated.

TOLEDO, Dec. 22.—A novel petition was filed in the United States Court by the employees of the Toledo, St. Louis & Kansas City Railroad, which has been in the hands of a receiver since May 22nd. The petition asks the Court to allow the employees to receive living wages from the company. It is represented that since the appointment of Receiver Calloway, wages have been systematically reduced until at present it is impossible for some to provide for their families. This is the first action of the kind ever commenced, and the men say as the United States Court would not allow the employees of the Ann Arbor Road to strike last spring, they have appealed to it for justice, rather than take chances of losing the strike and being out of employment the rest of the winter.

KANSAS CITY, Dec. 22.—A special to the Time, from Vinia, I. T.: An unsuccessful attempt was made this evening at Kelo four miles north of here, to hold up the Missouri, Kansas & Texas train. A switch was opened and the train ran upon the siding. This alarmed the engineer and, knowing there was a spring switch at the other end of the siding, he applied full steam and ran through. Finding they were foiled, the robbers, four in number opened fire with their guns. Fireman Charles Milne was shot in the face and his lower jaw torn off. The robbers mounted their horses and rode away. Officers are in pursuit.

The recent heavy snow storm prostrated the telegraph line, on account of which our telegraphic news this week is shorter than usual.

THE MIDWINTER FAIR.

Much Expected of Lincoln County in
Exhibits of Early Fruits and Pro-
duce. Are we to Disappoint
Them?

All over the State interest in the approaching Midwinter Fair is rapidly increasing. Exhibits are being prepared, subscriptions secured, committees appointed and other like necessary steps taken to secure for each county a good showing of what can be done in agricultural and mining matters.

Lincoln County, from her geographical position, and judged by the exhibit made last summer at Chicago, is expected again to make a showing which will surprise the majority of those that see it.

Mr. J. A. Yerrington, who was manager of Nevada's exhibit at Chicago, and who has been unanimously chosen to represent the state's interests at the Midwinter Fair, writes a citizen here as follows:

"I hoped that I might be able to visit your section personally, but owing to the limited time at my command I will have to depend entirely upon the citizens to assist me in this matter.

"I take pleasure in addressing you personally with a request that you will bring before the citizens the necessity of their immediate action. Lincoln County should be well represented, with her varied resources, and seeing that you are geographically situated for having the earliest productions to be had in this State, and in fact ahead of California. I think it would be a feather in our cap to place these on exhibit as early a date as possible.

Much stress was laid upon this matter when Lincoln's products were received in Chicago, over six weeks ahead of California.

"Anything you can do aiding me you may be sure will be very much appreciated, and I will endeavor to see that these exhibits are properly installed and well represented.

"If a few sacks of ore from the different gold mines were sent it would be advisable, to advertise freely. And I am making preparations for doing so, even going to the extent of at least having samples crushed and horned out before the public. A full synopsis of each claim should be sent. Other mineral bearing ore from the various mines can be sent in small quantities, as we will have no method of reducing same. And we trust that what we lack in quantity we can make up in quality."

To State Line Pass.

Work on the Nevada Southern is actively resumed. We have it from good authority that a contract of twenty-five miles of road, was recently let to Bright and Crandall, the former contractors on the road as built from the present terminus to State Line Pass. The work is to be completed within ninety days. This will extend the line some fifteen miles into Lincoln county, and bring it to within fifteen miles of Good Springs. As there is nothing to stop there for, we may look any day for word that preliminary work is also going on, this side of State Line Pass, on what will probably be called "the California and Nevada Southern," but never mind its name so long as it comes at all. The letter accompanying the map recently sent to the County Recorder states that the line of road as thereon indicated is subject to change. This is good for the reason that when everything is understood, the line in all probability will come up Meadow Valley Wash, instead of continuing northeast from the Muddy Valley, in which event Pioche will be directly on the line, or but a very short distance from it.

James Morris, Sheriff of Eureka county Nev., died in San Rafael, Cal., a week ago last Friday of consumption. Deceased was elected sheriff of Eureka county last election. He leaves a wife, daughter and brother, also a host of friends. He was a native of Ireland and about 50 years of age.

Unless you write or have printed upon your envelopes the number of days you wish them held, the postmaster will hereafter, by a new ruling, hold them for thirty instead of ten days. The Government has discontinued printing on envelopes, and hereafter that will have to be done at home.

Advertising.

One of the best advertising plans Ferguson district can adopt now is for mine owners to send to the Midwinter Fair, as an exhibit, a carload or two of their very richest and best looking ores, secure space for them and display in the form of pyramids. This is the plan which was followed at Chicago by a number of states not generally known to have any mineral resources at all, and the generous display of iron, lead, silver and other ores, made in the Mining building attracted much attention. In matters like this, quantity more than quality, is what is wanted, rather than the ordinary mind. A few impresses of rich ore from Ferguson, displayed under a glass cover would be very nice of course, but that can be as an almost any time and the ordinary mineral cabinet would very likely contain something to surpass it; but a few six or eight foot pyramids of rich gold rock labelled "Ferguson District" would do more special and general advertising in sixty days than is likely to occur at present rates in sixty years.

This need not entail any loss on exhibitors either except the difference in freight rates as shipped from here to Salt Lake, or to San Francisco. At the conclusion of the Fair the ore could be marketed, and the loss if any, would be comparatively trifling.

J. A. M. Hammond of Milford, Idaho, is accused of crowding sixteen horses into a stable, saturating the hay and the stable with coal oil and setting fire to it to secure the insurance on the animals and

"Keep it out of the Paper."

"Keep it out of the paper" is the cry which the newspaper publisher daily hears. To oblige often costs considerable, though the party who makes the request does not realize it. A newspaper is a peculiar piece of property in the public's eye. The news gathered is stored at because he gets hold of one item, and is abused because he does not get another. Young men and often young women, as well as older persons, perform acts which become legitimate items for publication, and then rush to the newspaper office to beg the editor not to notice their escapades. The next day they condemn the paper for not having published another party doing the same thing they were guilty of, forgetting apparently, their late visit to the printing office. The subscribers expect to read the news and there is always wonder when any of these items fail to appear in the next issue.

We are to have a state building this time. Let us see to it that the resources of our county are not allowed to lie dormant. A very little trouble will serve to supply good specimens of ore from nearly all our districts. The Agricultural station at Reno will furnish instructions how fruits and other like products may be preserved so as to maintain their full natural size and appearance, in fact, only manifest a desire to do something and you will meet with plenty of assistance.

The Hiko mail rider stated yesterday that the mill at Hiko, after running but a few days had been obliged to shut down owing to breakage. The pump which lifts water from the ditch to the mill tank had burst and one or two of the pans were out of order. No results are given of the work done. When the mill would be able to resume was not stated either.

In the Justice Court in the case of the State vs. Marcus Fredrick, charged with giving away cigarette paper contrary to law, at the request of the District Attorney Judge Linn sustained defendant's demurrer that the portion of the act was unconstitutional which made it a misdemeanor to give away cigarette paper for the reason that it was not mentioned in the title of the act. This action was taken in order that the question as to the constitutionality of the act may be tried before a court of competent jurisdiction. The case will now be appealed to the District Court.—Reno Journal.

The People's party was organized July 4, 1892, and is now only sixteen months old. Four months after its birth it polled 1,122,045 votes, carried six states, divided the electoral vote in three other states, electing five United States Senators, twelve Congressmen, and organized itself in forty-four states. It has lost none of the ground it won last year and in the recent elections was the only party which increased its voting strength. Does this look as though the People's party had passed out of politics?—Denver News.

Speaking of pensions, William A. Taylor, late Democratic candidate for Lieutenant Governor of Ohio, has presented a memorial to Congress, asking the treatment of Ohio pensioners by this administration be investigated. Mr. Taylor does not mince words in saying that he believes such an investigation will establish as incontrovertible facts among others, "that the government has been placed in a false and cruel attitude by its accredited and authorized agents and representatives; that the pension office was deceived into this false attitude by a conspiracy of such audacity and magnitude as to stagger belief." Mr. Taylor does not say so in his memorial, but, if there was a conspiracy such as he charges, the chief conspirator was Grover Cleveland. Mr. Taylor says further in his memorial that the charges upon which Ohio pensioners was suspended were "a part of that conspiracy" and were made "without investigation or a desire to investigate." The Democrats of the House committee on invalid pensions, of which representative Martin, of Indiana, is chairman, to which this memorial was referred, made an unsuccessful attempt to prevent its being made public, but Mr. Lacey of Iowa made it part of his pension speech.

Mr. Cleveland has not made a single new friend for his Hawaiian policy, which has few enough old ones. Heaven knows, by his tardy answer to the demands of Senate and House for the papers in the case. Notwithstanding the great mystery with which the administration has sought to surround the whole business, there is little in either the special message or the accompanying documents that was not previously known, and absolutely nothing that excuses the policy of the administration. If blood is shed in Hawaii, and the latest news seems to indicate there will be, the American people will rightfully hold Grover Cleveland responsible for it.

Pat had lately come to the country, and he was asking Mike, who had been here some years, the meaning of the 5-20, 7-30, and 10-40 bonds. "Well," said Mike to Pat, "them has one meaning for the rich and another for the likes of us; but take it all for the size of it 'tis about this—that we shall get up at 5-20 in the morning and work until 7-30 this evening in order that the rich may lie in bed till 10-40 in the day—see?"

"Typesetting by telegraph" is the latest idea, and according to Donald Murry, who sends to an eastern paper information on the subject all the way from Sydney, it is more than a vision in the air. It is an actual invention, for which Mr. Murry says he has recently obtained patents in the United States, Great Britain, France, Germany and other countries. He claims that it is possible by his invention to operate at a distance, over a single telegraph wire, a typewriter, a typesetting machine, a piano or any other keyboard instrument.
